

VA-VIBX

Sound Masking System Vibration Loudspeaker

The VA-VIBX loudspeaker is designed to generate the optimum masking sound through a wall or ceiling partition. When applied on a light partition such as a gypsum wall or ceiling, the VA-VIBX converts the wall to a sound masking loudspeaker. The result is a diffuse sound perfect for effective sound masking.

The VIBX is also excellent for anti-espionage applications and can significantly limit sound transmission between rooms when attached to windows, doors and HVAC ducts.

Specifications	
Power	5W
Enclosure Material	Fireproof ABS
Frequency Response	100 Hz to 8 kHz
Connectors	Screw-On
Driver	Vibration Exciter
Max Nb VIBX / Channel	4 per output channel
Mounting	Self-adhesive*
Color	White
Weight	0.14 kg (0.3 lbs)
Shipping Weight	0.25 kg (0.6 lbs)
Box Dimensions	14.5x14.5x3.5cm (5 1/2x5 1/2x1 1/4in)

*Tap speaker to 2W@25V
